

VETERINARY HEALTH CERTIFICATE

COUNTRY : MALAYSIA

II. The undersigned Official Veterinarian certifies that the animal(s) / hatching eggs described above satisfy(ies) the following requirements :

II. The undersigned official veterinarian certifies that the animal/hatching eggs described above satisfy(ies) the following requirements :

1. Highly Pathogenic Avian Influenza (HPAI), H5 and H7 Low Pathogenic Avian influenza (LPAI) and Highly Pathogenic Influenza A Viruses Infection (non-poultry including wild birds), and New Castle Diseases are compulsorily notifiable in the exporting country.
2. The exporting country has been free from highly Pathogenic Avian influenza, H5 and H7 Low Pathogenic Avian Influenza (LPAI) and Highly Pathogenic Influenza A Viruses Infection (non-poultry including wild birds), for the past 3 (three) months prior to export in accordance with relevant article of OIE Terrestrial Animal Health Code:
3. The premises of origin must be officially registered with the competent veterinary authority in the country of origin. The details (nama, address and registration number) of the premises where the birds been resident for the last 180 days must be provided; The premises of origin be under government veterinary authority supervision and subject to regular official veterinary inspection.
4. The premises of origin free from velogenic Newcastle Disease and West Nile virus infections for the past 6 (six) months prior to export.
5. The birds have not been within 100 km of a reported cases of West Nile virus in the 180 days preceding export.
6. The birds were kept in isolation approved by the Veterinary Services since they were hatched or for at least 21 days prior to shipment and showed no clinical sign of infection with a virus which would be considered avian influenza in poultry during the isolation period.
7. A statistically valid sample of the birds, selected in accordance with OIE Terrestrial Animal Health code was subjected to be diagnostic using end point or quantitative Polymerase Chain Reaction (PCR) test for influenza type A and New Castle Disease within 14 days prior to shipment to demonstrate freedom from infection with influenza A virus and paramyxovirus type 1 (PMV-1) in birds and a copy of the laboratory report is attached.
8. The birds of Psittaciformes order were originated from establishment in which no clinical cases of Pacheco's disease, Psittacine Beak & Feather Disease (PBFD), Psittacine Pox were reported for at least 12 (twelve) months prior to shipment and were kept under supervision for 45 days prior to shipment and were treated against Psittacosis (Chlamydia Psittacii infections) using Chlortetracycline or Doxycycline and showed no clinical sign of Psittacosis on the day of shipment.
9. The birds were subjected to diagnostic tests for detection of Salmonella enteritidis and Salmonella Typhimurium infection. The sample (tracheal and or Cloacal swabs) were taken from all birds prior to exporting into Indonesia and submitted to a government authorized veterinary laboratory where they were tested microbiologically for Salmonella enteritidis and Salmonella Typhimurium isolation with negative results and a copy of the laboratory report is attached.
10. On the day of shipment, the birds have been inspected by a veterinary officer in full time employment of Government Veterinary Authority showed no clinical sign of infection.
